

# Obergail ([8a.nu](http://8a.nu))

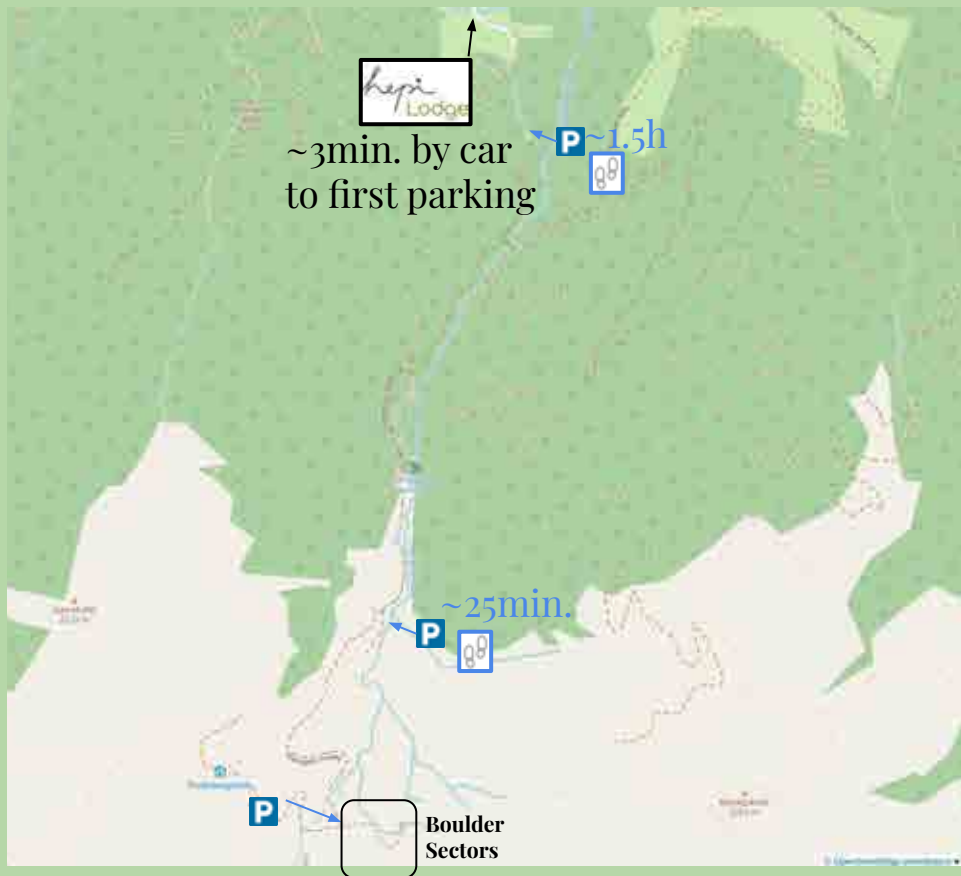

## Parking:

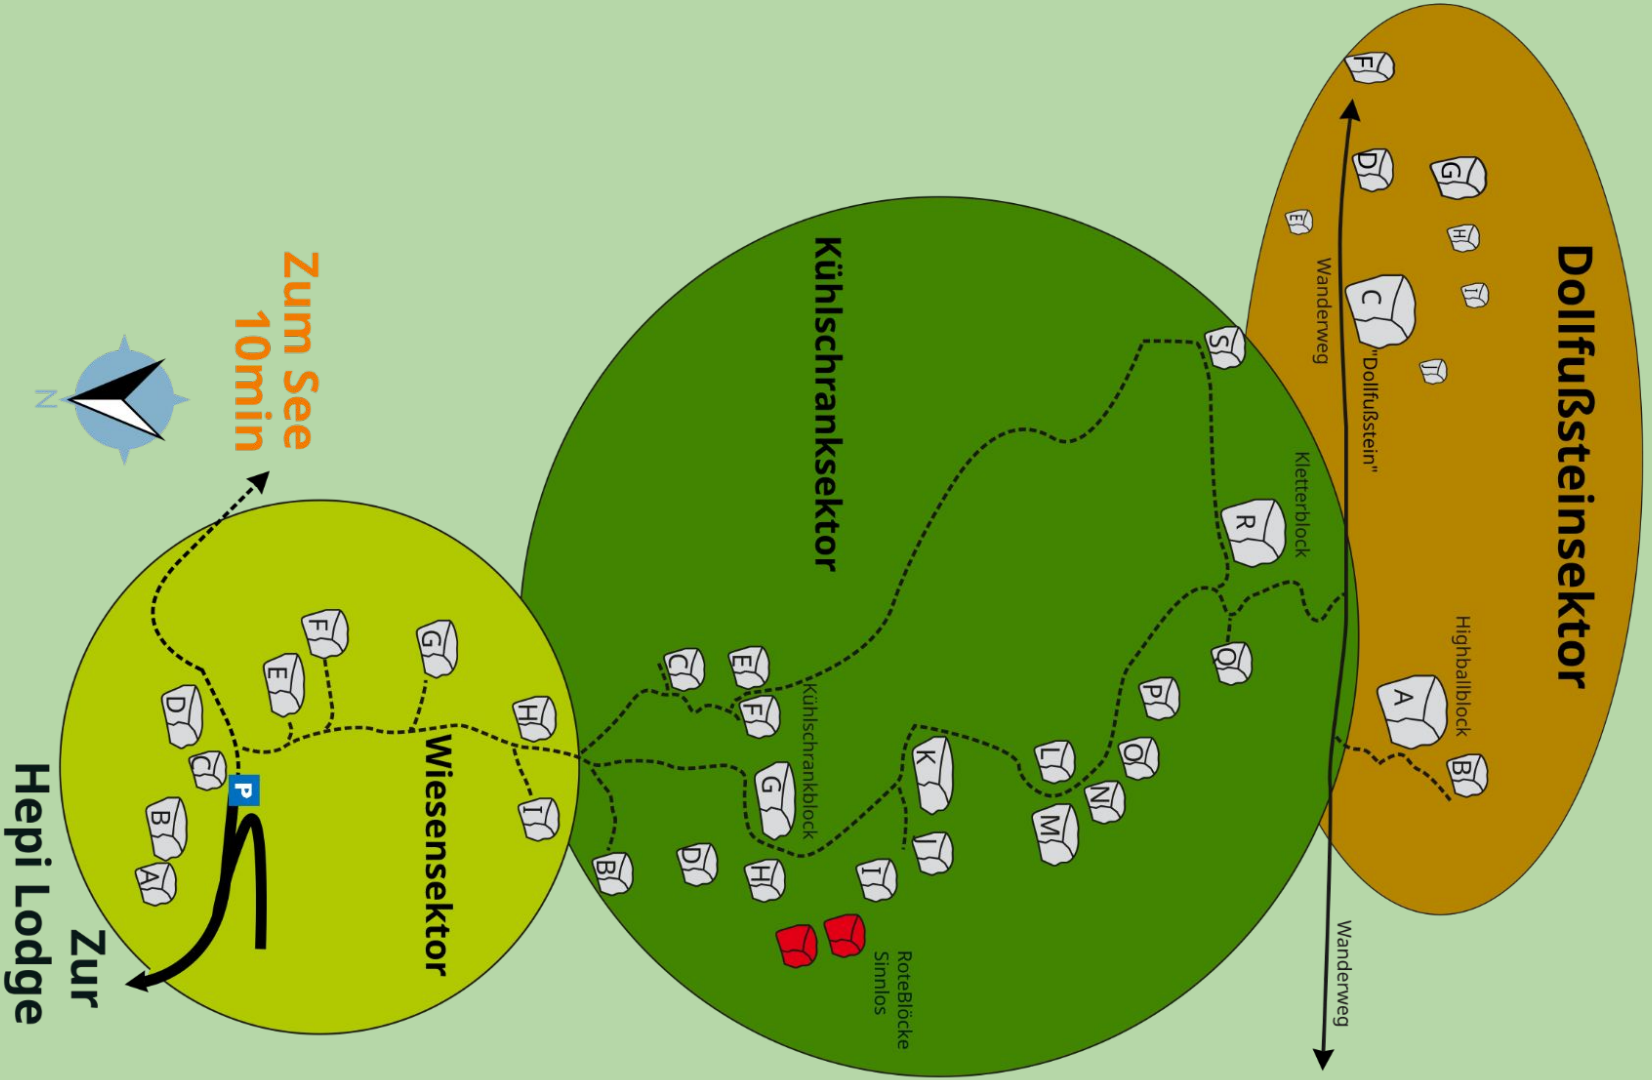

First parking at "Bienenlehrpfad". Second parking after wooden gate lower left of first hut. Third parking at the very first block. For second and third parking a SUV style car is beneficial and **a key for the gate is required** (borrow it at HEPI LODE). Third parking needs low water height (check with HEPI LODGE). **NO CAMPING AFTER FIRST PARKING PLEASE!!!**

## New lines needed:

This boulder area is relatively new - this means there is still huge potential for both easy and hard lines. Please send your *First Ascents* (best via Photo or even better via Video) to "[christopher.rogi@gmail.com](mailto:christopher.rogi@gmail.com)" and your line will make it into the next version! Please feedback any errors you may find. Leave your grade suggestions on 8a.nu and I'll update here.

Credits: Thanks to Hannes Haberl for creating the very first Topo back in 2016 after the first Boulderfestival. Many pictures and the overview map were reused. Thanks to Stefan Köchel and Raphael Seher for review and line inputs!

# Wiese A (North)

Dirty topout, make sure to clean it first!

## Mad Cock 6A

Without left good edge, tricky mantle

## Mad Kante 5C

# Topo-Legend

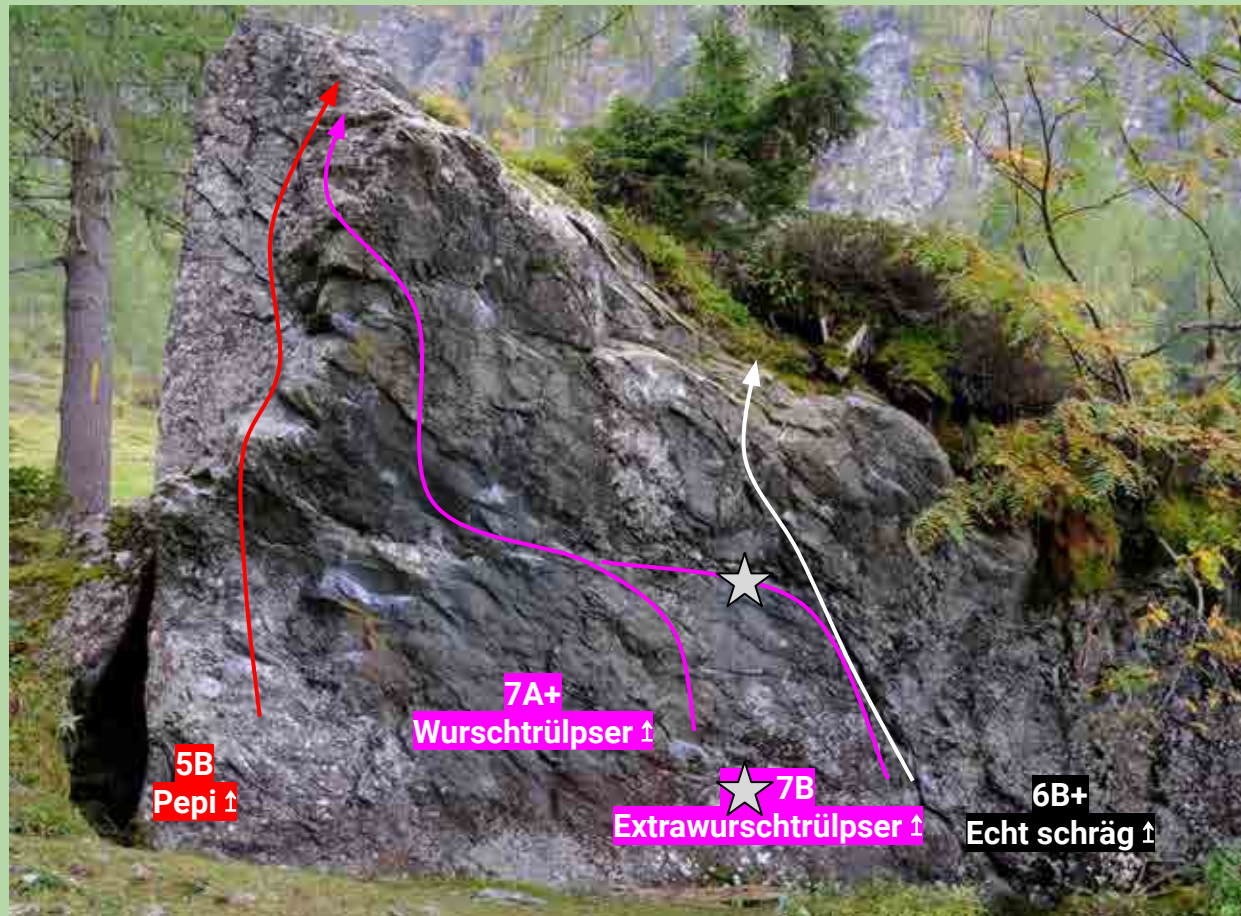

Stand-start always possible and most often easier! Try it and **don't have any grade respect, just have fun!**

## Hopp, auf! 5A

Slab-bouldering, stand-start

## Hopp, auf! (No-fingers) 5A ([Video](#))

Practise your feet: Climb to the top without your fingers (only for the mantle)

# Wiese G (East)

All boulders can be done as stand-start to make them easier. Easy but high topout in the center to get used to it. Easy way down on the back and on the south. Various other combinations are possible (e.g. "Caranguejo into Eisbär", or "Eisbär into highest point of the boulder", ..)

## Saubär 5B ([Video](#))

Hard starting moves into an easy low mantle

## Schwarzbeer 5C ([Video](#))

Big and hard first move to a jug above and mantle to the left into a side-out

## Caranguejo 5B ([Video](#))

Obvious starting jugs

## Eisbär 5A ([Video](#))

High starting crimps. **Attention:** Big block/jug in the center might be loose!

## Eisberg 5B ([Video](#))
